

INTERACTIVE MOTION SENSITIVE SENSOR

Abstract of the Disclosure

Portable accelerometer coupled to a processor and wireless transceiver
5 providing remote monitoring of sensed acceleration. A BLUETOOTH®-compatible
transceiver allows bi-directional communication including transmission of operating
parameters and programming as well arm and cancel commands. Networked
communications allows remote monitoring and integration with public safety
answering point (PSAP). Signal processing at the portable device discerns includes
10 comparison of sensed acceleration with stored profile.
